ABSTRACT

This document presents South Carolina's Comprehensive Career Guidance Program for kindergarten through grade 12. The model presented provides a framework for local districts to use in evolving a program to meet the specific career development needs of their district's students. It attempts to organize, expand, and extend competency-based career development strategies, activities, and experiences to assist students in making realistic career goal plans and apprise them of how to use the public schools' curriculum and experiences to further their career goals. Career development is described as the fifth basic skill (in addition to language arts, mathematics, social studies, and science) that students need to prepare themselves for constructive participation in society. The Comprehensive Career Guidance Program is depicted as evolving around three interrelated domains (self-knowledge, educational development, and career development) which remain the same throughout the model, while the competencies are developmental at each grade level. Following a discussion of the roles of the counselor, the school staff, parents, the community, and administrators, the career guidance program is presented for grades kindergarten-3, 4-5, 6-9, and 10-12. For each grade division, an overview describing characteristics and needs of students regarding career development is provided; career guidance objectives are stated; competency-based planned activites involving counselors, teachers and other staff, parents, community, and administrators are given; and resources necessary for the planned activities are included. THE MISSION

"The mission of the State Department of Education is to ensure that each student enrolled in the state's system of public elementary and secondary education is provided with appropriate educational opportunities to prepare him/her for constructive participation in society, immediate employment and/or further education; that these opportunities are made available to every student regardless of his/her economic status, race, sex, geographic location, or mental/physical handicap; and that the resources appropriated to operate the state's system of public elementary and secondary education are utilized in a judicious and efficient manner."

South Carolina Department of Education

Dr. Charlie Williams
State Superintendent

COMPREHENSIVE CAREER GUIDANCE PROGRAM

PURPOSE

The primary purpose of this project is to present a model Comprehensive Career Guidance Program for grades K-12. This model will provide the framework for local districts to evolve a program which will meet the specific career development needs of their district's students. It is the intent of this model program to organize, expand and extend competency based career development strategies, activities and experiences in order to assist students in making realistic career goal plans and apprise them of how to use the public school's curriculum and experiences to further their career goals.

THE FIFTH BASIC SKILL

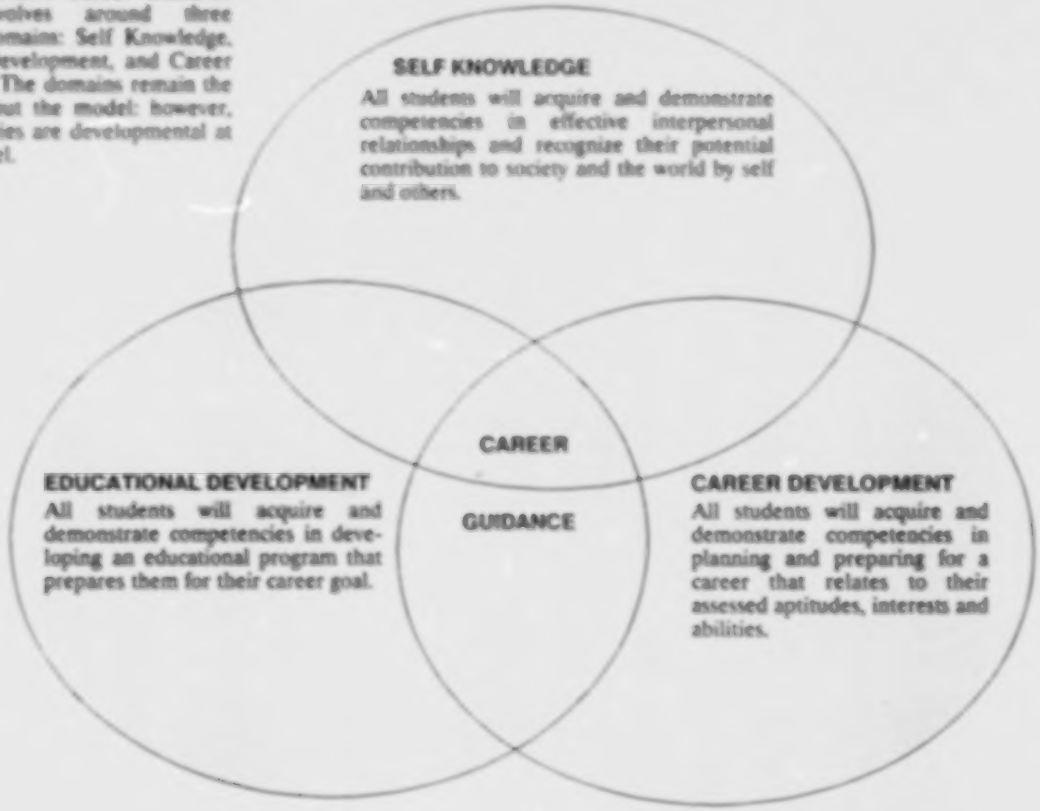
Education opportunities for all students are made available through the public school curriculum with the core areas of learning identified as the Basic Skills. These four basic skills are identified as Language Arts, Mathematics, Social Studies and Science. Competencies developed through these curricula are sequential and developmental and will prepare individuals to effectively use their knowledge in the performance of many tasks. Basic skills are, therefore, identified as the fundamental abilities one needs in order to function adequately in a society. The ultimate goal of education is to provide each student with the academic knowledge and skills needed for further education and/or training for the eventual purpose of successful entry into the workforce.

Career development is the Fifth Basic Skill that all students need in order to prepare themselves for constructive participation in society and the realization of a desired life style. Career development begins at an early age with basic information and experiences and continues in a developmental manner which includes a series of transitions involving individual growth and environmental changes. Career development gives the individual the opportunity to explore self and career options, secure an understanding of occupations, acquire decision making skills, develop a positive work ethic, clarify an understanding of work and make realistic career plans necessary to enter an occupation.

The Comprehensive Career Guidance Program provides students, K-12, with the information and experience necessary to develop competencies which will help students make realistic career plans and prepare them with the career development skills necessary to successfully enter the global work place.

COMPREHENSIVE CAREER GUIDANCE PROGRAM

The Comprehensive Career Guidance Program envolves around three interrelated domains: Self Knowledge, Educational Development, and Career Development. The domains remain the same throughout the model: however, the competencies are developmental at each grade level.



SELF KNOWLEDGE
All students will acquire and demonstrate competencies in effective interpersonal relationships and recognize their potential contribution to society and the world by self and others.
CAREER
GUIDANCE
EDUCATIONAL DEVELOPMENT
All students will acquire and demonstrate competencies in developing an educational program that prepares them for their career goal.
CAREER DEVELOPMENT
All students will acquire and demonstrate competencies in planning and preparing for a career that relates to their assessed aptitudes, interests and abilities.

THE COMPREHENSIVE CAREER GUIDANCE PROGRAM

THE COUNSELOR

Counselors provide leadership in the career guidance program; however, effective delivery of the program will depend on teaming with other groups. Counselors need to keep up-dated on new career guidance materials and participate in professional development experiences to improve their skills and knowledge related to career guidance.

THE COUNSELOR

.... provides leadership for initiating efforts to design a Comprehensive Career Guidance Program K-12 for their district.

.... involves teachers, peers, business/industry, parents and community resource persons.

.... plans student learning experiences and competencies for use in classroom settings.

.... includes volunteers, special needs staff, school health nurses, paraprofessionals and other students.

.... assists students to investigate career options and plan pathways to careers through individual and group career guidance activities.

THE FACULTY AND STAFF

Career guidance activities should be integrated in all subject areas and grade levels. This strategy will give new life and meaning to course content as well as adding relevancy to the world of occupations.

THE FACULTY

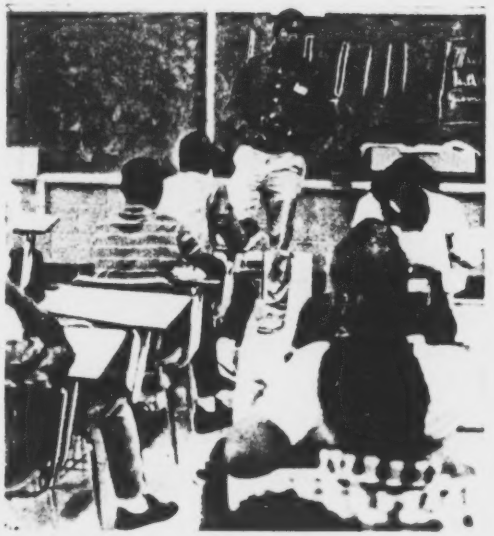
.... plans classroom career guidance activities with the counselor.

.... utilizes infusion strategies which integrates career development activities into all subject areas and grade levels.

.... plans activities utilizing up-to-date resources such as the South Carolina Occupational Information System (SCOIS).

.... makes available up-to-date resources which provides occupational and career information.

.... acts as resource persons by sharing interests and experiences with students.



THE PARENT

The family structure and environmental surroundings have a dynamic impact on the developmental progress of a child. Career guidance can be more effective when it has support from the home and family structure. It is vitally important that the home and family be actively involved, wherever appropriate, in all activities. Parents, significant others and other family members strongly influence the perspective students have on work and the demands placed upon them by society. What is considered to be valuable and worthwhile is often communicated to children either greatly hindering or promoting the concept of work.

THE PARENT

- .... maintains an active interest in and support of career guidance activities
- .... displays positive attitudes about the concept of work
- .... provides opportunities for and encourages the expression of their child's individual aptitudes, interests and abilities
- .... will learn what career options are available to their children in preparation for the time when they will enter the adult world.

THE COMMUNITY

The community is an integral part of a career development program. Business and industry depend upon the youth in communities to supply human resources for their many jobs as well as to prosper and become consumers of their products and services.

THE COMMUNITY

- .... provides students with occupational information
- .... participates in the Adopt-A-School Program
- .... provides settings in which students can gain actual work experience
- .... supports career guidance programs (fraternal organizations, community service organizations and interest groups)

ADMINISTRATORS

Administrators must be genuinely and overtly in support of a Comprehensive Career Guidance Program. Their enthusiasm will engender within their school district and the community the willingness to lend active support to the successful implementation of a comprehensive career guidance program.

ADMINISTRATORS

- .... provide leadership and support necessary to integrate career guidance into the instructional program
- .... encourage the acceptance and development of a career guidance program
- .... plan staff development activities in order to develop the level of understanding of the tenets of career guidance
- .... support the establishment of a career guidance advisory committee
- .... define staff and administrative guidance responsibilities
- .... provide adequate facilities, materials and time for the program
- .... provides for evaluation of the program

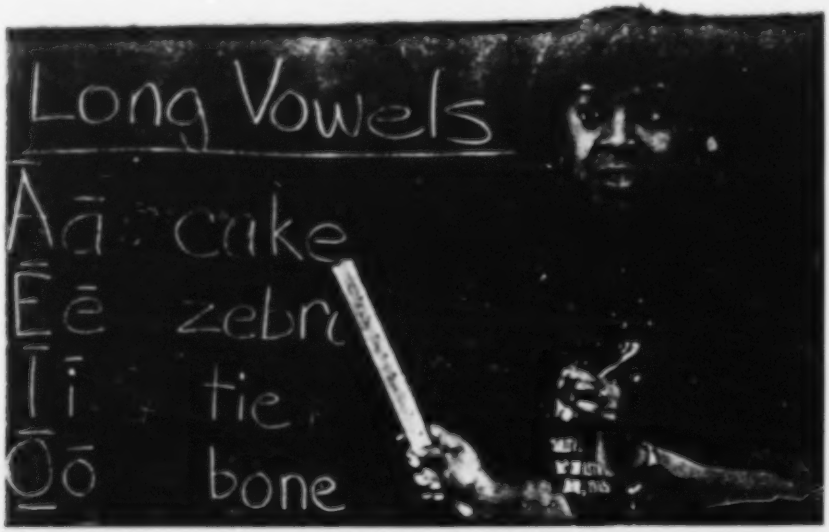
THE FORMAT

The Comprehensive Career Guidance Program follows a sequential, developmental plan of objectives, expected student outcomes, and activities to bring about these outcomes for students in K-12. The program will be presented in the following format for grade segments K-3, 4-5, 6-9, 10-12.

* An overview describing characteristics and needs of students regarding career development.
* Stated career guidance objectives.
* Competency based planned activities involving counselors, teachers and other staff, parents, community and administrators.
* Resources necessary for planned activities.

ELEMENTARY CAREER DEVELOPMENT OVERVIEW

The primary goal for career guidance at the elementary school level is aiding children to begin mastering the competencies which are essential for a productive and rewarding way of life. The Elementary Career Development Program is concerned with the self knowledge, educational and career development aspects of the student. The program is not intended to force children to make premature career choices; rather it focuses on the awareness of career choices and pathways to achieve individual career goals. It emphasizes planning for careers based upon their relationship to individual personal characteristics. Students will become more aware of themselves, how they are changing and how they can use school experiences to explore and prepare for the future.



CAREER GUIDANCE OBJECTIVES
ELEMENTARY (K-3)

GRADES	EDUCATIONAL	SELF KNOWLEDGE	CAREER
K	1. Awareness of why learned skills and knowledge are important. 2. Awareness of how to use the Career Learning Center. 3. Awareness of the importance of workers in society.	1. The students will begin a Career Development Record. 2. Awareness of personal and physical characteristics. 3. Awareness of how their behavior influences the feelings and actions of others.	1. Awareness of how careers can be divided into two groups. 2. Students will become aware of occupations in their community. 3. Students will learn about leisure activities.
1	1. Awareness of paid and unpaid work. 2. Awareness of skills necessary in some careers. 3. Awareness of how decisions are made.	1. Knowledge of the basic necessities of life. 2. Knowledge of personal and physical abilities. 3. Awareness of how workers dress for their occupations.	1. Awareness of self-employment courses. 2. Awareness that careers can be classified according to working with data people or things. 3. Awareness of occupation of family members/significant others.
2	1. Awareness of how educational interests relate to careers. 2. Awareness of how technology has changed work. 3. Awareness of why academic skills are necessary.	1. Students will complete the Career Development Record for this grade level. 2. Awareness of abilities and strengths. 3. Awareness of socially acceptable behavior.	1. Awareness of what is meant by the work environment. 2. Awareness that many occupations are necessary in order to produce and deliver a product. 3. Awareness of occupations that provide us the "basic necessities".
3	1. Awareness of how money earned affects the family. 2. Awareness of why work is important. 3. Awareness that making mistakes can be an important part of learning.	1. Awareness of the importance of a positive self-concept. 2. Awareness of how physical development can affect a career choice. 3. Awareness of the importance of good personal habits.	1. Awareness of occupational titles. 2. Awareness of the diversity of occupations in the community. 3. Awareness of leisure time occupations.

CAREER DEVELOPMENT EDUCATION
KINDERGARTEN

OBJECTIVES:

1. Awareness of why learned skills and knowledge are important.
2. Awareness of how to use the Career Learning Center.
3. Awareness of the importance of workers in soicety.

PLANNED ACTIVITIES

STUDENT PERFORMANCE OBJECTIVES	COUNSELOR	FACULTY/STAFF	PARENTS	COMMUNITY	SCHOOL ADMINISTRATION
1. Students will relate why skills and knowledge are important.	1. Plan activities with teacher. Use learning centers to demonstrate what they will learn.	1. Plan activities with counselor. Have students give examples of what they expect to learn.	1. Demonstrate interest in students learning process.	1. Speaker: Skills Necessary In My Job.	1. Visit class and talk about what will be learned in their learning centers.
2. Student will perform activities in the career learning center.	2. Assist teachers in developing a "career" learning center.	2. Develop a "Career" learning center in classroom.	2. Provide materials from occupations for career learning center.	2. Provide materials representing business for career learning center.	2. Encourage staff to develop a career learning center
3. Students will relate the importance of workers in their community.	3. Plan activities with teachers emphasizing the importance of all workers in society.	3. Plan activities with the counselor.	3. Discuss how their occupation is important to society.	3. Speaker From Local Chamber of Commerce—Business in our community.	3. Encourage field trips to business and support with time and funds.

CAREER DEVELOPMENT
CAREER GUIDANCE
KINDERGARTEN

OBJECTIVES:

1. Students will learn that all careers can be divided into two groups.
2. Students will become aware of occupations in their community.
3. Students will learn about leisure activities.

PLANNED ACTIVITIES

STUDENT PERFORMANCE OBJECTIVES	COUNSELOR	FACULTY/STAFF	PARENTS	COMMUNITY	SCHOOL ADMINISTRATION
1. Given a variety of careers, students will determine the career group to which each belongs (Service Product).	1. Plan with teachers a group activity using pictures of people working (Service Product).	1. Plan with counselor classroom activity of people working.	1. Parents will tell the student about their job.	1. Provide speakers from businesses and industry (Service Products).	1. Encourage staff to use community as a resource.
2. Students will name several occupations in their community.	2. Group activity - plan activity about occupations on "Main Street".	2. Post pictures representing occupations in community.	2. Point out the various business and industries in their community.	2. Provide field trip sites for "Main Street".	2. Support activities through assignments of staff and paraprofessional for field trip "Main Street".
3. Students will distinguish between leisure activities and work.	3. Group activity	3. Plan activities with counselor.	3. Parents will relate what leisure activities they prefer.	3. Provide field trip sites and speakers from leisure type occupations.	3. Staff orientation encouraging teachers to share information about leisure activities.

SELF KNOWLEDGE

FIRST GRADE

OBJECTIVES:

1. Knowledge of the basic necessities of life.
2. Knowledge of personal and physical abilities.
3. Awareness of how workers dress for their occupation.

PLANNED ACTIVITIES

STUDENT PERFORMANCE OBJECTIVES	COUNSELOR	FACULTY/STAFF	PARENTS	COMMUNITY	SCHOOL ADMINISTRATION
1. Each student will state three basic necessities needed by everyone.	1. Plan activities that explain basic necessities through pictures.	1. Plan activities with counselor.	1. Explain how their job provides money for basic necessities.	1. Speakers that provide basic necessities.	1. Administrator list "Basic Necessities" for operating a school.
2. Each student will describe two abilities they possess.	2. Plan activity describing various abilities one may have. Explain that we all have different abilities.	2. Plan activity with counselor.	2. Discuss their abilities.	2. Speaker emphasizing an ability used in their work (cake decorators, football player, keyboard, etc.)	2. Speak to class about abilities needed in their job (other staff members).
3. Each student will describe how some workers dress for their job.	3. Plan activities describing appropriate necessary attire for a job (Coveralls, Lab coats, Costume, Space Suits, etc.).	3. Plan a career dress up day or hats only.	3. Describe what appropriate attire is for their job.	3. Speaker dressed in work clothes (Diver, Lab Technician, Welder, Construction).	3. Support activities with enthusiasm.

CAREER DEVELOPMENT
CAREER GUIDANCE
FIRST GRADE

OBJECTIVES:

1. Awareness of self-employment careers.
2. Awareness that careers can be classified according to working with; data, people and things.
3. Awareness of occupation of family member/significant other.

PLANNED ACTIVITIES

STUDENT PERFORMANCE OBJECTIVES	COUNSELOR	FACULTY/STAFF	PARENTS	COMMUNITY	SCHOOL ADMINISTRATION
1. Students tell what self-employment means.	1. Plan classroom sessions describing self-employment careers.	1. Prepare activities showing self-employed persons.	1. Discuss self-employment versus working for someone else.	1. Speaker-franchise for fast food or other self-employed persons (Doctors, Cobbler, etc.).	1. Support activities.
2. Students will identify occupations as related to data-people-things.	2. Classroom sessions careers classified as data-people-things.	2. Plan a visual display of occupations - data people, things.	2. Discuss in which category their job falls.	2. Speaker for each category.	2. Support activities.
3. Students will describe occupations of family member/significant other.	3. Relate occupations of parents to classifications of careers.	3. Provide classroom time for occupational descriptions and classifications.	3. Volunteer to speak to class about occupation.	3. Support parent speaker activity.	3. Describe occupation and how it is classified (combining data-people-things).

RESOURCES:
Career and Technology Awareness

ADDITIONAL ACTIVITIES:

CAREER DEVELOPMENT EDUCATION

SECOND GRADE

OBJECTIVES:

1. Awareness of how educational interests relate to careers.
2. Awareness of how technology has changed work.
3. Awareness of how academic skills are necessary.

PLANNED ACTIVITIES

STUDENT PERFORMANCE OBJECTIVES	COUNSELOR	FACULTY/STAFF	PARENTS	COMMUNITY	SCHOOL ADMINISTRATION
1. Identify favorite school subject and relate it to an occupation. 2. Describe two inventions-past, present and future. 3. Explain how the "basic skills" are necessary to every day living.	1. Classroom sessions identify careers related to subject area. 2. Classroom sessions discuss *technology and careers. Ideas to products. 3. Classroom sessions describing how language arts, math, social studies and science are important to everyday living.	1. Plan lessons about careers related to subject area. 2. Plan lessons that relate to inventions - past, present and future. 3. Plan lessons relating subject area to everyday living skills.	1. Discuss favorite subject when they were in school. 2. Discuss how new investions have changed their work place and their work. 3. Relate how the "basic skills" are necessary in work.	1. Speaker - "Favorite subject and my career". 2. Provide field trip site - New ideas and inventions. 3. Speaker - "Literacy in Every Day Living".	1. Support activities. 2. Present - How computers have changed our work. 3. Support activities.

SECOND GRADE

OBJECTIVES:

1. Complete the Career Development Record for this grade level.
2. Awareness of abilities and strengths.
3. Awareness of socially acceptable behavior.

PLANNED ACTIVITIES

STUDENT PERFORMANCE OBJECTIVES	COUNSELOR	FACULTY/STAFF	PARENTS	COMMUNITY	SCHOOL ADMINISTRATION
1. Complete the career development record.	1. Have teachers and volunteers assist students in completing their record.	1. Assist counselors.	1. Review career development record. Provide assistance to counselors and teachers.	1. Support with volunteers to help counselors.	1. Support activity.
2. Students will describe their abilities and strengths.	2. Classroom sessions - describe abilities and strengths.	2. Discuss - ability some students have academically and/or physically. Strengths as it relates to character.	2. Discuss their abilities as it relates to their work.	2. Speaker—Abilities needed in our business.	2. Support activities.
3. Students will demonstrate socially acceptable behavior.	3. Classroom - discuss and role play behavior activities.	3. Plan good behavior activities.	3. Discuss and role model acceptable behavior.	3. Support good behavior activities (Medal, Star Certificate).	3. Provide recognition and reward for those demonstrating outstanding behavior.

RESOURCES:
Career and Technology Awareness

ADDITIONAL ACTIVITIES:

CAREER DEVELOPMENT
CAREER GUIDANCE
SECOND GRADE

OBJECTIVES:

1. Awarenessof various work environments.
2. Awareness that several occupations are necessary in order to produce a product.
3. Awareness of occupations that provide us the "basic necessities" (food, clothing, shelter).

PLANNED ACTIVITIES

STUDENT PERFORMANCE OBJECTIVES	COUNSELOR	FACULTY/STAFF	PARENTS	COMMUNITY	SCHOOL ADMINISTRATION
1. Students will explain how families use money.	1. Classroom sessions-Money and its uses.	1. Coordinate with counselor.	1. Review family expenditures.	1. Speaker—Banks and money.	1. Awareness of various work environments.
2. Students will discuss why work is important.	2. Classroom sessions-Why people work.	2. Coordinate with counselor-School as your job.	2. Discuss why they like/dislike their work.	2. Speaker—Why I like my job.	2. Support.
3. Students will relate what they learned from their mistakes.	3. Classroom sessions-Mistakes are learning experiences.	3. Coordinate with counselor.	3. Relate what they have learned from mistakes.	3. Speaker—How We Learn From Mistakes.	3. Support.

RESOURCES:
Career and Technology Awareness

ADDITIONAL ACTIVITIES:

CAREER DEVELOPMENT EDUCATION
THIRD GRADE

OBJECTIVES:

1. Awareness of how money earned affects the family.
2. Awareness of why work is important.
3. Awareness that making mistakes can be an important part of learning.

ADDITIONAL ACTIVITIES:

MIDDLE/JUNIOR HIGH SCHOOL CAREER DEVELOPMENT OVERVIEW

Early adolescents are slowly moving from seeking and meeting adult expectations to that of seeking and meeting their own expectations through friendships and interactions with their peer group. Excitable, easily motivated, creative, inquisitive, and eager to explore, students require a learning environment that is participative and action oriented. Educational achievements will be maximized to the extent that the school program responds to and acknowledges these traits. The Career Development Program at the Middle/Junior High School must be designed as an integral part of the school curriculum and must address the needs of these young people, allowing each opportunities to explore various educational and career interests and to express an individual developing self.

Career development should begin in the elementary school and progress sequentially as do the basic skills. The developmental approach continues throughout a student's years in school and beyond. A Career Development Program should present information and challenging activities which encourage students to become aware of all alternatives open to them in harmony with their abilities, interests, aptitudes and desired life style.

CAREER GUIDANCE OBJECTIVES
ELEMENTARY (6-9)

GRADES	EDUCATIONAL	SELF KNOWLEDGE	CAREER
6	1. Explore education and skill requirements of various careers. 2. Expand knowledge of curriculum offerings at high school. 3. Expand knowledge of the relationship of career choice to life styles.	1. Complete the Career Development Record. 2. Explore personal needs and academic abilities. 3. Expand knowledge of how personal maintenance affects careers.	1. Explore all career clusters. 2. Expand knowledge of occupations in career clusters. 3. Expand knowledge of how career choice affects leisure time.
7	1. Expand knowledge of how educational achievement can impact on career options. 2. Explore how the H.S. curriculum can begin training the student for a career. 3. Explore how peer pressure can influence decisions and school work.	1. Complete the Career Development Record. 2. Explore careers that relate to interests aptitudes and abilities. 3. Developing a work ethic.	1. Explore occupations in various career clusters. 2. Expand skills in finding and using sources of career information. 3. Expand knowlege of career opportunities in South Carolina.
8	1. Students will plan a four year HS curriculum. 2. Expand knowledge of how technology affects career options. 3. Awareness of how academic and vocational skills are used at home and work.	1. Complete the Career Development Record. 2. Each student will participate in a career Interest Inventory and Needs Assessment. 3. Explore personal needs and wants - now and future.	1. Expand knowledge of the SCOIS. 2. Explore how careers relate to community needs. 3. Explore entrepreneurship as a career option.
9	1. Recognize that occupational skills can be learned through high school courses. 2. Appraise their academic and vocational strengths and weaknesses. 3. HIGH SCHOOL CAREER DEVELOPMENT OVERVIEW

The high school years represent a critical time in the lives of students. For some students, this includes preparation for entry into post-secondary education; for other students, it includes direct entry into the work force or the military. For other students it is a time of disillusionment, frustration and poor self concept. The peer pressure encountered during these years can influence the future success or failure academically, socially and occupationally. Career development programs must respond to individual needs, readiness and motivation and must help all students prepare for the transition into the adult world. Students need to develop competencies that will enable them to make important choices that they will face during their high school years and develop the skills they will need as they mature in their own career development.

CAREER GUIDANCE OBJECTIVES
HIGH SCHOOL (10-12)

GRADES	EDUCATIONAL	SELF KNOWLEDGE	CAREER
10	1. Recognize the relationship between academic/vocational achievement and career planning. 2. Recognize the importance of business/industry in their community. 3. Recognize that careers require various levels of academic/skill preparation.	1. Complete the Career Development Record. 2. Recognize the importance of physical and mental development to career success. 3. Expand knowledge of changes in male/female roles and how this relates to career decisions.	1. CAREER EXPLORATION
MIDDLE/JUNIOR HIGH SCHOOL
Sample Student Needs Assessment Survey

This survey is conducted to help us plan a career development program that will be helpful and valuable to you. There are no wrong answers. We are asking what you think and feel because your ideas about what should be included in a career development program are important. We appreciate your cooperation and your honest opinion.

Please use the following key for your responses. Circle one response for each item. A. Definite Need B. Some Need C. Do Not Need

The types of help I need:			
1. To understand how the courses I am now taking are important to various occupations.	A	B	C
2. To get information about job opportunities.	A	B	C
3. To know how to apply for a job.	A	B	C
4. To know how to get "on the job" experience.	A	B	C
5. To have access to information about careers.	A	B	C
6. To have information about vocational courses offered in our school district.	A	B	C
7. To get a part-time job.	A	B	C
8. To know how my interests, abilities and aptitudes relate to careers.	A	B	C
9. To know how to involve my parents in career planning.	A	B	C
10. To know what jobs are available in my community.	A	B	C
11. To know what salary I can expect in various careers.	A	B	C
12. To know how to choose my high school courses in order to help me reach a career goal.	A	B	C
13. To know more about military careers.	A	B	C
14. To know how to choose a career that will meet my needs for money and security.			
15. To know what resources in my school provide career information.			

Please answer the following items:

1. My career goal is to become a _____.
2. I plan to attend _____ (Tech/College/University) after graduation from high school.
3. I plan to work as a _____ after graduation from high school.
4. List three (3) careers in which you are interested and put the entry level salary you would expect.

Career	Salary
_____	_____
_____	_____
_____	_____

5. Describe your ideal career environment. _____.

CURRICULUM

Planning a high school curriculum, with a career in mind, is of utmost importance in preparing for the future. Vocational Programs teach skills that can qualify a person for entry level positions in today's challenging and demanding job market. Work bound or College bound, an occupational skill can be an asset to every young person in South Carolina.

There are six occupational vocational education programs offering one-hundred different vocational education courses in South Carolina's public schools. All courses are not offered in every school; many are regionally and/or industrially oriented ie. textiles and marine maintenance. An assessment of local business/industries' need for employees determines to a large extent what courses are offered within a vocational area. At the present time, occupational skill development programs are only offered at the high school level. The skills and education acquired through these vocational programs, if successfully completed, will qualify a young person for entry-level employment or further education/training. The following is an example of how a student is able to enroll in a vocational program when selecting either a general or college preparatory curriculum.

HIGH SCHOOL CURRICULUM PLAN

GENERAL DIPLOMA

NINTH GRADE
1. Language Arts (Required)
2. Math (Required)
3. Science (Required)
4. Physical Education (Required)
5. Social Studies (Required)
6. ..... (Elective)

APPLIED/RELATED COURSES

PREVOCATIONAL EDUCATION

Schools are required to provide prevocational education as an elective in grades 9 or 10. The units of instruction should include five occupational areas plus the World of Work.

*INDUSTRIAL ARTS

This course consists of one year of industrial arts laboratory or mechanical drawing in grades 9-12.

*Being phased out in favor of Industrial Technology Education. (July 1, 1990)

INDUSTRIAL TECHNOLOGY EDUCATION

Industrial Technology Education is a course developed to provide manipulative operations and experiments with tools, materials, processes, and products directly related to four occupational clusters. The major objective is to provide students with a foundation in safety, the use of tools, equipment and materials, and familiarity with occupationally specific nomenclature. The program also serves as a orientation program to enable students in grades 9-11 to make informed decisions as to their interest and compatibility with occupational areas requiring technology knowledge and competence.

* Applied Communications
* Applied Biology - Chemistry

* Presently being developed.

PRINCIPLES OF TECHNOLOGY

This course is designed to be both academically rigorous and practical for students in grades 11-12 planning technical careers. It includes 14 units of instruction. Each of the 14 units deals with one principle as it applies to the four energy systems -- mechanical, fluid, thermal, and electrical -- that make up both simple and complex technological devices and equipment. The units will include the mathematics needed to understand and apply the principles.

APPLIED VOCATIONAL MATHEMATICS

A two semester course designed to develop mathematical problem-solving and computational skills for students in grades 9-12.
